LightningFAX ®

ENTERPRISE EDITION

FAX SERVER SOFTWARE FOR FAX BOARDS

The Trusted Enterprise Fax Server Solution

For organizations of all sizes

The proven, scalable fax server solution for dedicated fax boards

Sagem-Interstar's LightningFAX® Enterprise Edition is award-winning fax server software that empowers organizations with cost-effective desktop email faxing and fax broadcasting. Users send and receive faxes directly from their existing email clients, or from T.37-compliant multifunction printers (MFPs).

LightningFAX consolidates fax hardware and analog fax lines into a single system. Say good-bye to fax-related leasing, maintenance and supply costs. Organizations are saving thousands of dollars a year using LightningFAX Enterprise.

LightningFAX's rapid, secure and reliable routing of faxes makes it the trusted choice for handling any fax volume. Document workflow is streamlined and privacy is improved, all while yielding significant ROI.

Reducing Telecom Costs

LightningFAX boosts productivity by 90% over traditional manual faxing,[1] since users no longer need to make time-consuming trips to the fax machine. LightningFAX can reduce telecom costs by 40% or more over traditional faxing.

In multi-branch organizations, long-distance fax charges are drastically reduced through LightningFAX's built-in Least Cost Routing (LCR). Faxes travel over the enterprise IP network until they reach the system resource closest to their final destination.

Fax Automation and Document Workflow

LightningFAX's ActiveX and API toolkits give you powerful tools for integrating fax into your enterprise's document workflow and automating repetitive or sensitive operations.

LightningFAX gives you options such as its powerful SendFAX interface, which provides advanced annotating and broadcasting functions for your power users.

Security and Compliance

LightningFAX protects document privacy and facilitates compliance with regulations such as HIPAA and the Sarbanes-Oxley Act. It routes sensitive documents in TIFF or PDF format via the security of VoIP networks and VPN encryption to approved recipients and designated secure printers.

A Future-Proof Investment

LightningFAX Enterprise multiserver architecture can easily accept additional fax servers to accommodate any growth in fax volume. For IP networks, you can easily migrate to XMediusFAX, the market-leading boardless FoIP (Fax over IP) software.

LightningFAX®
ENTERPRISE EDITION
FAX SERVER SOFTWARE FOR FAX BOARDS

The proven fax server solution for any fax volume

LightningFAX typically pays for itself within 3–6 months.

New in LightningFAX

- **Fax Approval:** Users can add a workflow process by assigning a Fax Reviewer to a LightningFAX user
- **Broadcast Notifications:** LightningFAX now includes an enhanced notification mechanism that notifies a user once a broadcast is completed
- **Enhanced Support:** Windows Vista and Office 2007, Microsoft Exchange 2007, and more

EASY INTEGRATION

LightningFAX easily integrates with existing databases, applications and groupware tools, even using existing directories and phone books.

SCALABILITY

LightningFAX boasts a robust multiple fax server architecture, built to be the most scalable fax server around. Easily add servers as you expand your organization to different locations.

RELIABILITY

LightningFAX has been implemented in mission-critical applications around the world.

When fax is an essential part of your business process, features like load balancing and failover support (using Windows clustering) and distributed processing make LightningFAX the obvious choice.

For complex and unique deployments, our team of experienced support professionals is second to none.

FLEXIBILITY

A host of administration features like Batch Fax API, scripting support, billing codes, and remote monitoring give you powerful control over transmission, logging, delivery and notification of faxes.

Users can send individual faxes or fax broadcasts from their familiar email programs, a Web interface, or the feature-rich LightningFAX SendFAX Client.

Faxes can be sent immediately or scheduled.

PRIMARY FEATURES

- Up to 120 fax channels per server
- Highly scalable multiserver architecture
- Support for G3 and G4 TIFF fax format
- Terminal Services and Citrix MetaFrame support
- Network installation support with Windows Installer technology
- Windows Roaming Profiles support

EMAIL SERVER SUPPORT

- Microsoft Exchange 2007/2003/2000
- Lotus Notes 7.0/6.5/6.0
- Any SMTP-compliant mail server

ADMINISTRATIVE FEATURES

- Active Directory and Microsoft Exchange integration with MMC Snap-in
- Automatic user sync with Lotus Notes, Microsoft Exchange and LDAP directories
- Remote monitoring and user management
- Graphical fax port monitor
- Administration automation through scripting
- Exportable transaction logs

- Extensive notification, deletion and printing options
- Priority Scheduling
- Number Modification table
- Number Restriction table

PRODUCTIVITY FEATURES

- Access to Microsoft Outlook (MAPI), Lotus Notes or any ODBC contact database
- Advanced phone book research from the fax composition interface
- Drag & drop transmit
- Add text insertions, highlights, and stamps to faxes
- Custom forms allow users to select coversheets and modify fax transmission settings in Microsoft Outlook
- Email notifications

FAX CLIENTS, TOOLS & INTERFACES

- Microsoft Outlook 2007, 2003, XP, and 2000 (with or without custom forms and/or integrated LightningFAX SendFAX client)
- Lotus Notes (with or without SendFAX client)
- LightningFAX SendFAX client for advanced fax composition
- Web interface
- Fax Manager, Coversheet Editor and Phonebook applications
- PrintToMail and PrintToWeb drivers
- Any mail client via SMTP (i.e., Microsoft Outlook Express, Eudora and Mozilla Thunderbird)

SERVER CONVERSION OF DOCUMENTS

- Adobe PDF, Microsoft Word, PowerPoint, Excel
- HTML, JPEG, GIF and RTF

LightningFAX
ENTERPRISE EDITION
FAX SERVER FOR LEGACY FAX BOARDS

LightningFAX Enterprise

FAX NOTIFICATION & FORMAT

- Through email in HTML or text format
- Fax attachments in PDF or fax TIFF

FAX BOARD SUPPORT

- Brooktrout TR1034 analog and digital, and TruFax
- Dialogic Diva Server BRI, 4BRI, PRI/E1, PRI/T1, and Analog-2P/-4P/-8P

AUTOMATIC ROUTING

- Automatic DID, DNIS, ANI, CSID, Channel & LDAP
- Manual Attendant

MULTIFUNCTION PRINTER SUPPORT

- Multifunction printers (SAGEM, OKI Printing Solutions, HP, Xerox, Lexmark) with Scan-To-Email or T.37 functionality
- Sagem-Interstar Connector for eCopy ShareScan OP
- HP digital sending devices
